

7.2 Overview of reviewed literature

The following table summarizes the content of the reviewed literature with regard to the main topics that are discussed in this report. This form allows identifying the original sources of information in the report.

X: Reference contains information on the corresponding topic.

X: Reference contains information on the corresponding topic and is explicitly quoted in the report.

Comment: Several references contain relevant information on certain topics but are not explicitly quoted in the report (see *X*) as corresponding information has already been given by other substantial references.

Table 1: Overview of reviewed literature – main content and citation in this report.

	Energy storage systems	Technology options	Requirements for automotive application	Current status and perspectives	Production, recycling, disposal (resources & energy use)	Vehicle concepts & market overview	General characteristics and applications	Energy efficiency & consumption	Price premium	Market overview EVs	Pilot projects	Market introduction of EVs	Business models	Use pattern and charging schemes	Market penetration scenarios	Market barriers, policy issues & initiatives	Environmental impacts	Considering average emission factors	Interaction with electricity market	Interaction with EU legislation	Air quality and noise
